

Data Analysis Project: Toman Bike Share

By: David Chan

Data Analysis Workflow

1. Create a database
2. Develop SQL queries
3. Connect Power BI to DB
4. Build a dashboard in Power BI
5. Answer the analysis question

Email Request

Request for Development of Toman Bike Share Dashboard

Dear Data Analyst

We need your expertise to develop a dashboard for “Toman Bike Share” that displays our key performance metrics for informed decision-making

Requirements:

- Hourly Revenue Analysis
- Profit and Revenue Trends
- Seasonal Revenue
- Rider Demographics

Design and Aesthetics: Use our company colors and ensure the dashboard is easy to navigate.

Data Source: Access to our databases will be provided. If no database, please create one

Deadline: We need a preliminary version ASAP

Please provide an estimated timeline for completion and recommendation on raising prices next year

Best regards,

Toman Bike Share

Recommendation

Conservative increase: Considering the substantial increase last year, a more conservative increase might be prudent to avoid hitting a price ceiling where demand starts to drop. An increase in the range of 10-15% could test the market's response without a significant loss of customers.

Price Setting:

- If the price in 2022 was \$4.99, a 10% increase would make the new price about \$5.49.
- A 15% increase would set the price at approximately \$5.74.

Recommended Strategy:

Market Analysis: Conduct further market research to understand customer satisfaction, potential competitive changes, and the overall economic environment. This can guide whether leaning towards the lower or higher end of the suggested increase.

Segmented Pricing Strategy: Consider different pricing for casual versus registered users, as they may have different price sensitivities.

Monitor and Adjust: Implement the new prices but be ready to adjust based on the immediate customer feedback and sales data. Monitoring closely will allow you to fine-tune pricing strategy without committing fully to a price that might turn out to be too high.
